

Query: Node 1691 is designated as query node with query attribute 2.

ICD returns the idio-community for node 1691, highlighted in red. We observe that node 1691 is at the center and the most influential node in this community ($k=1$).

ATC returns the community within the dashed box, which is centered around node 519. Node 1691 is a periphery node in this community and is not influential.

ACQ returns a community of 191 nodes, which is too large to visualize, but we can confirm that node 1691 is also not influential in the community.
